Lab 01

GitHub Identity, Student Portal Registration, and Ubuntu Server Installation

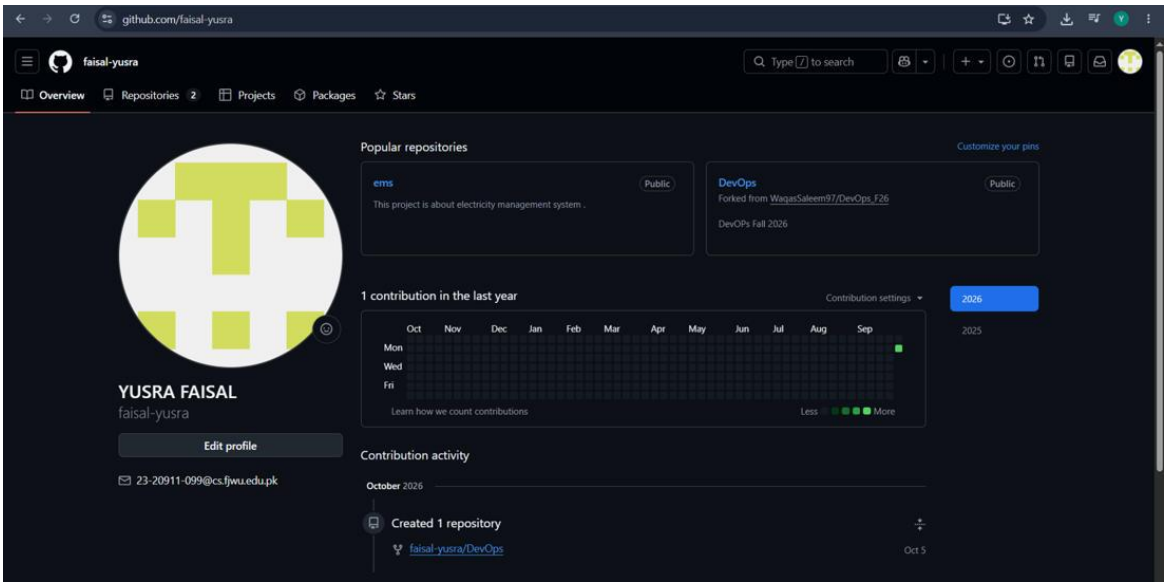

Full Name:	Yusra Faisal
Registration No:	2023-BSCS-099
Course Code:	CS-649 (Cloud DevOps)
Section:	B
GitHub Username:	faisal-yusra

Getting Started: Folder Structure

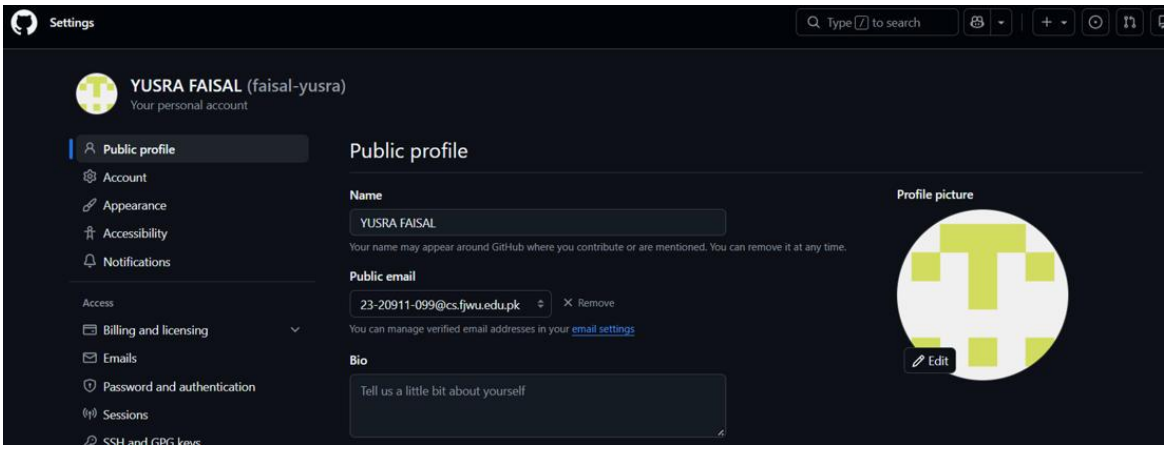

Repository folder Labs/Lab01/screenshots created in my GitHub repo. (lab01_folder_structure.png)

Task 1: Create and Configure Your GitHub Account

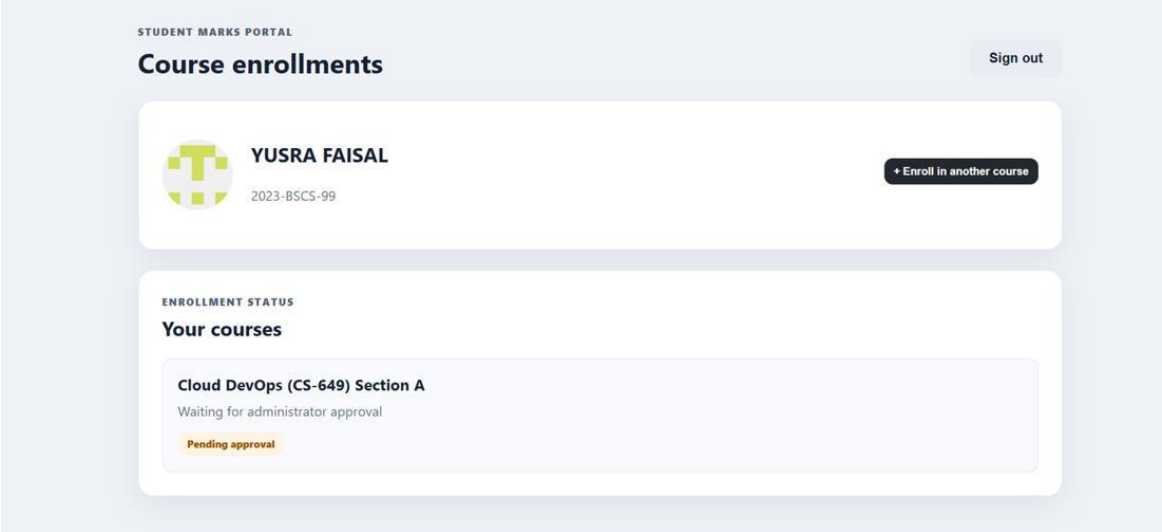

GitHub profile showing my name and username faisal-yusra. (github_profile.png)

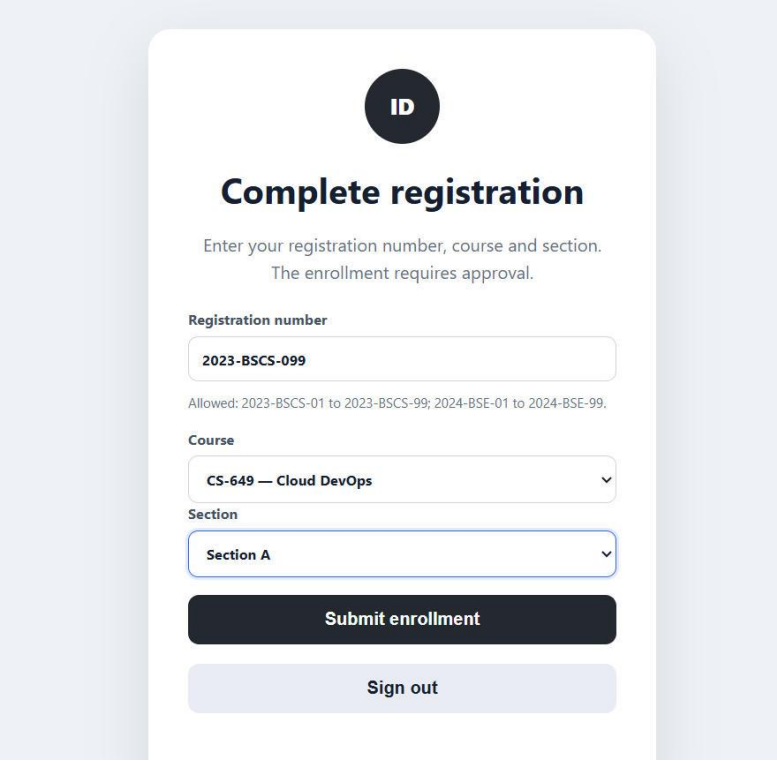

Public profile settings showing my complete actual name. (github_actual_name.png)

Task 2: Register in the Student Marks Portal

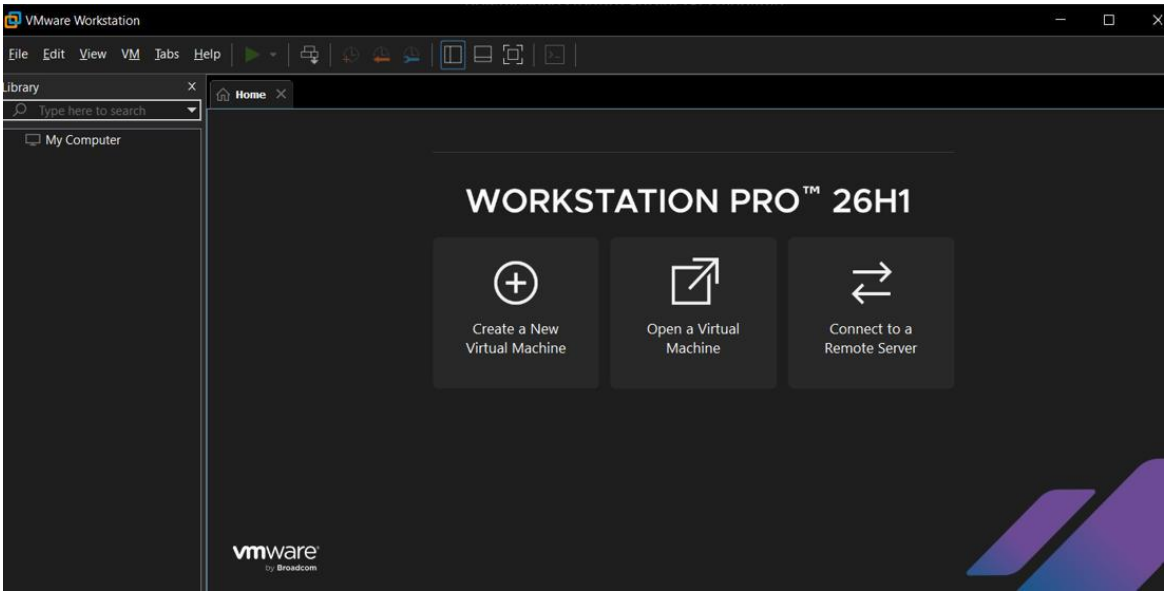

Portal showing my GitHub profile information and the submitted enrollment (Cloud DevOps, Section A) pending approval. (portal_github_profile.png, portal_enrollment_submitted.png)

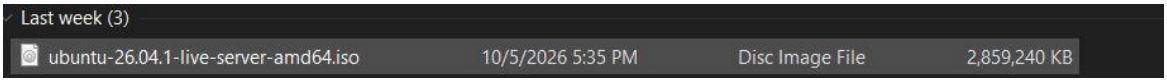

Enrollment form completed with registration number, course and section. (registration form (extra))

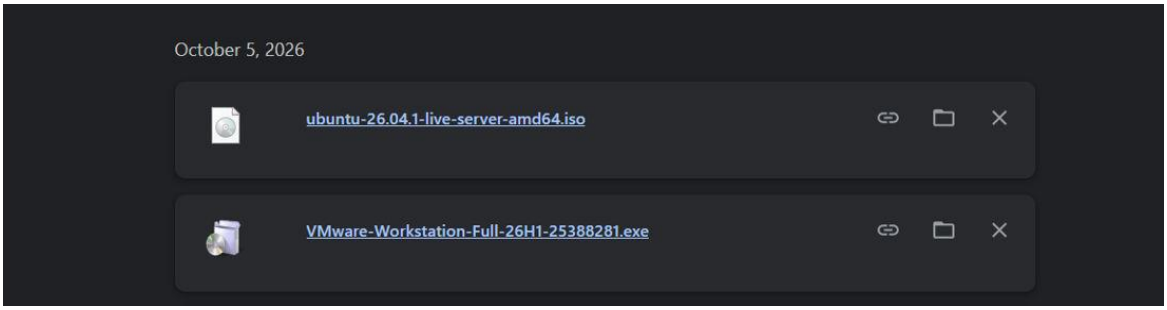

Task 3: Download VMware Workstation Pro and Ubuntu Server

VMware Workstation Pro 26H1 installed and running. (vmware_workstation.png)

Downloaded Ubuntu Server 26.04.1 LTS ISO file (ubuntu-26.04.1-live-server-amd64.iso) in the Downloads folder. (ubuntu_server_iso.png)

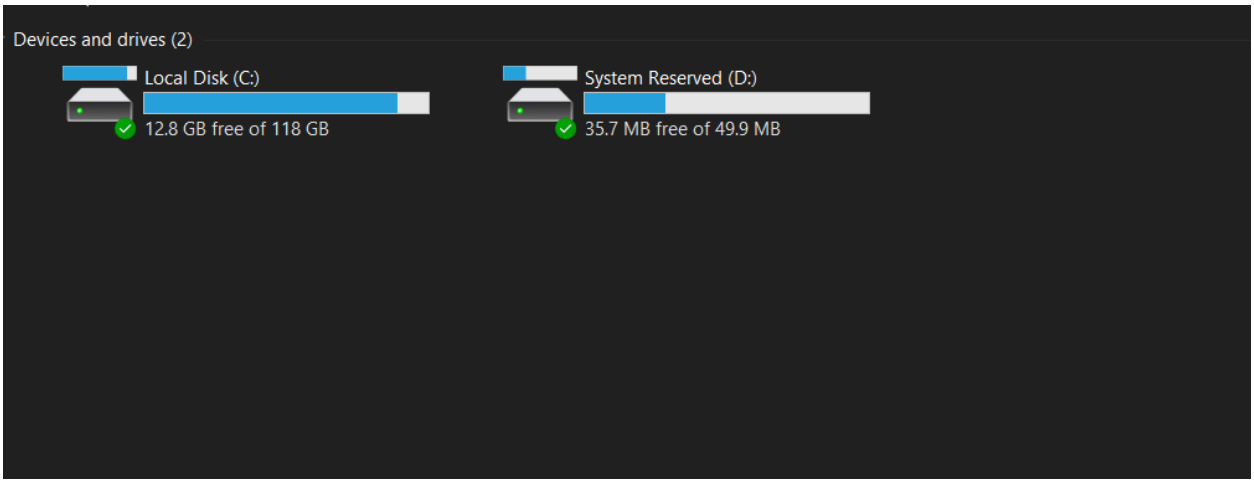

Browser download list showing the same ISO filename. (ubuntu_server_iso(extra))

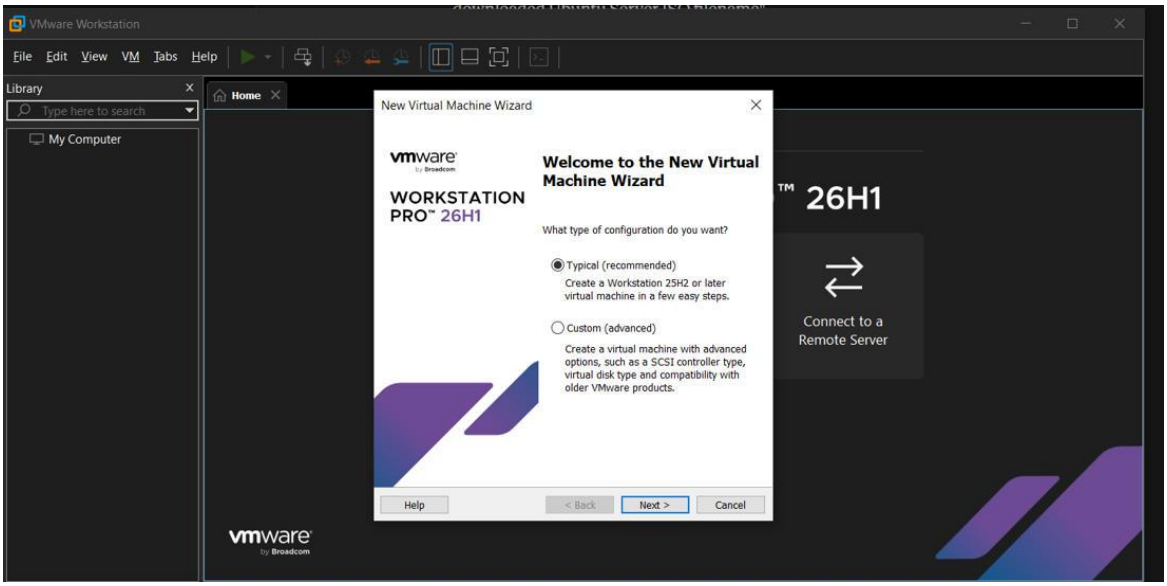

AVAILABLE STORAGE

I FORGOT TO TAKE SCREENSHOT

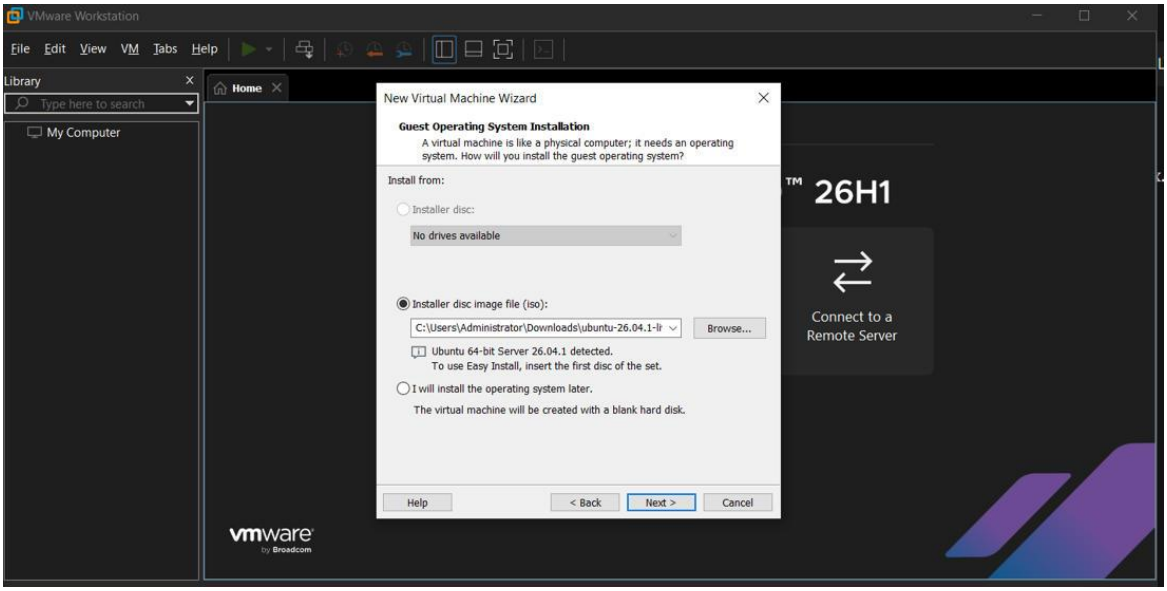

AFTER INSTALLATION CURRENT DRIVE HAS FOLLOWING MENTIONED STORAGE

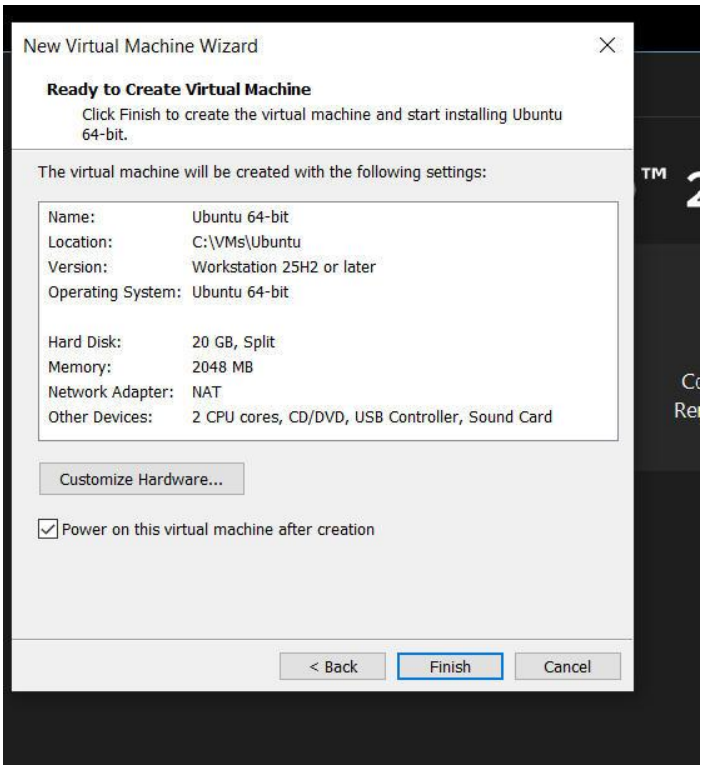

Task 4: Create the Ubuntu Server Virtual Machine

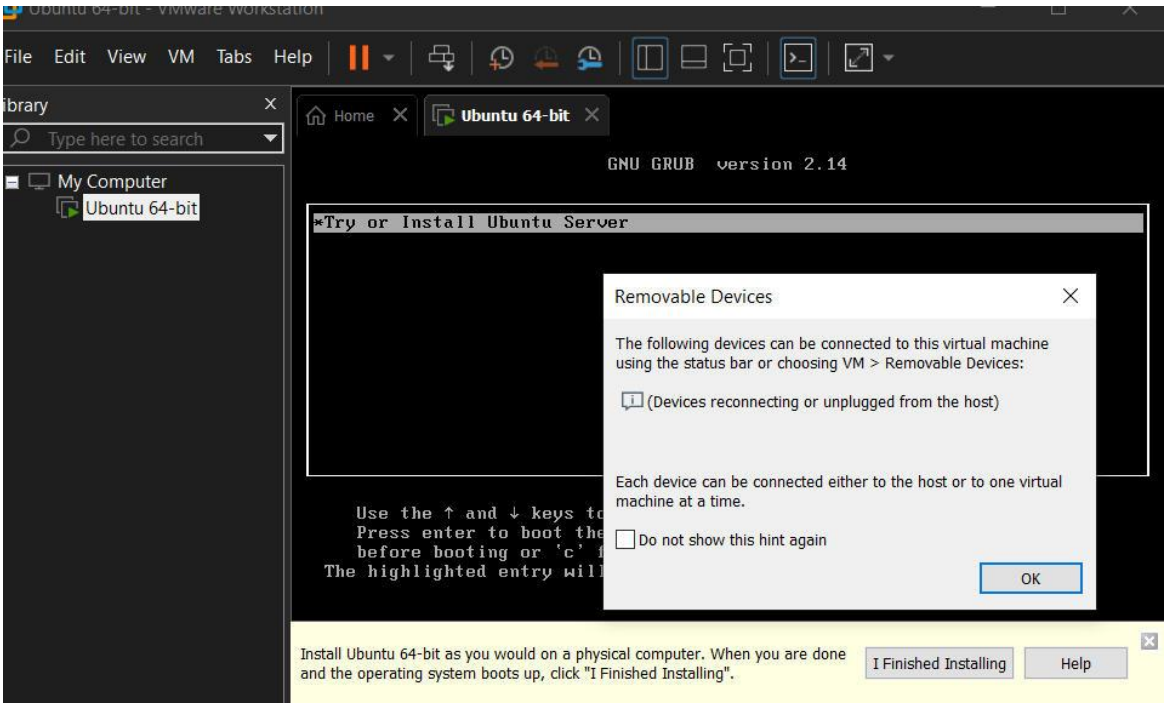

New Virtual Machine Wizard with Typical (recommended) configuration selected. (vm_creation_wizard.png, vm_typical_configuration.png)

Ubuntu Server ISO selected as the installer disc image file. (vm_ubuntu_iso_selected.png)

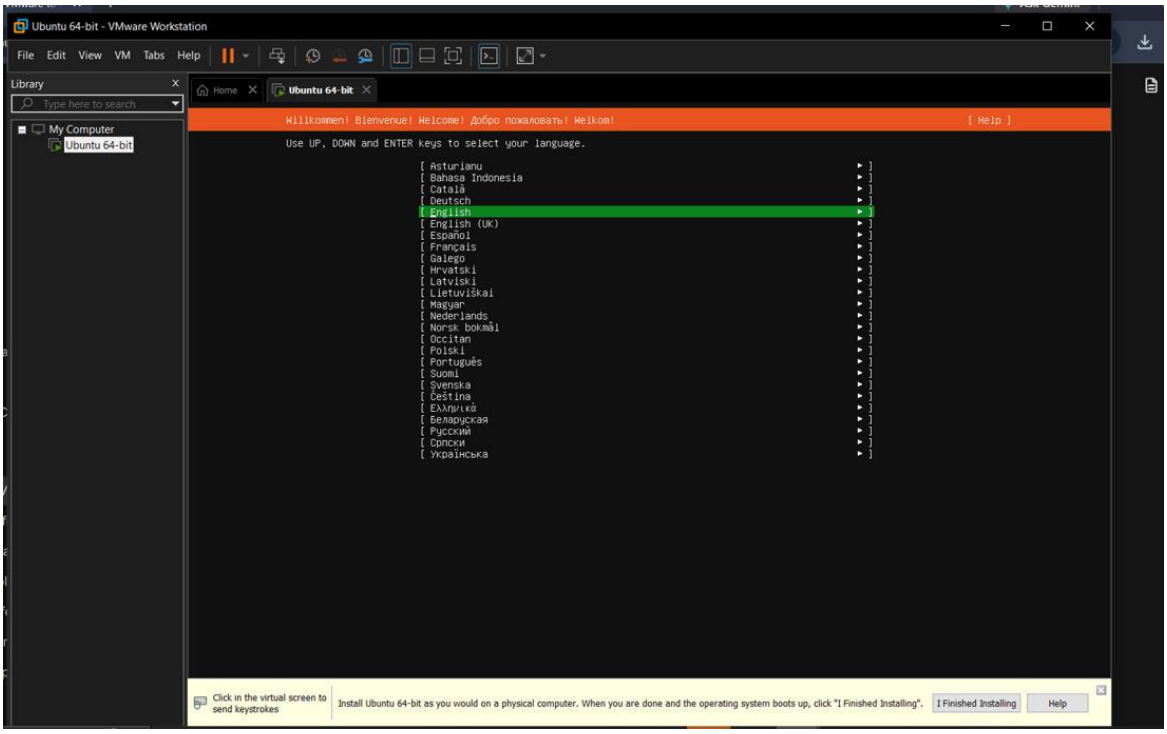

Final virtual machine configuration: 20 GB disk, 2048 MB memory, NAT network.
(vm_configuration_summary.png)

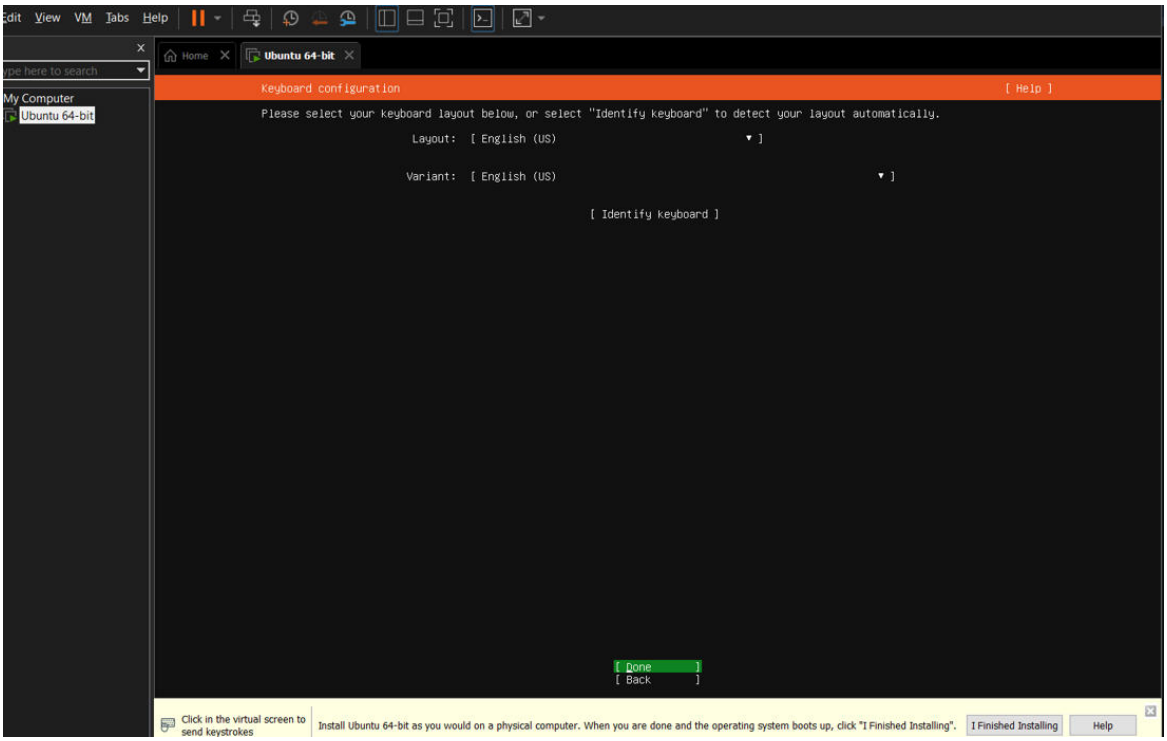

Ubuntu Server installer boot menu (GRUB) shown after powering on the virtual machine.
(ubuntu_installer_boot.png)

Task 5: Choose the Installation Language

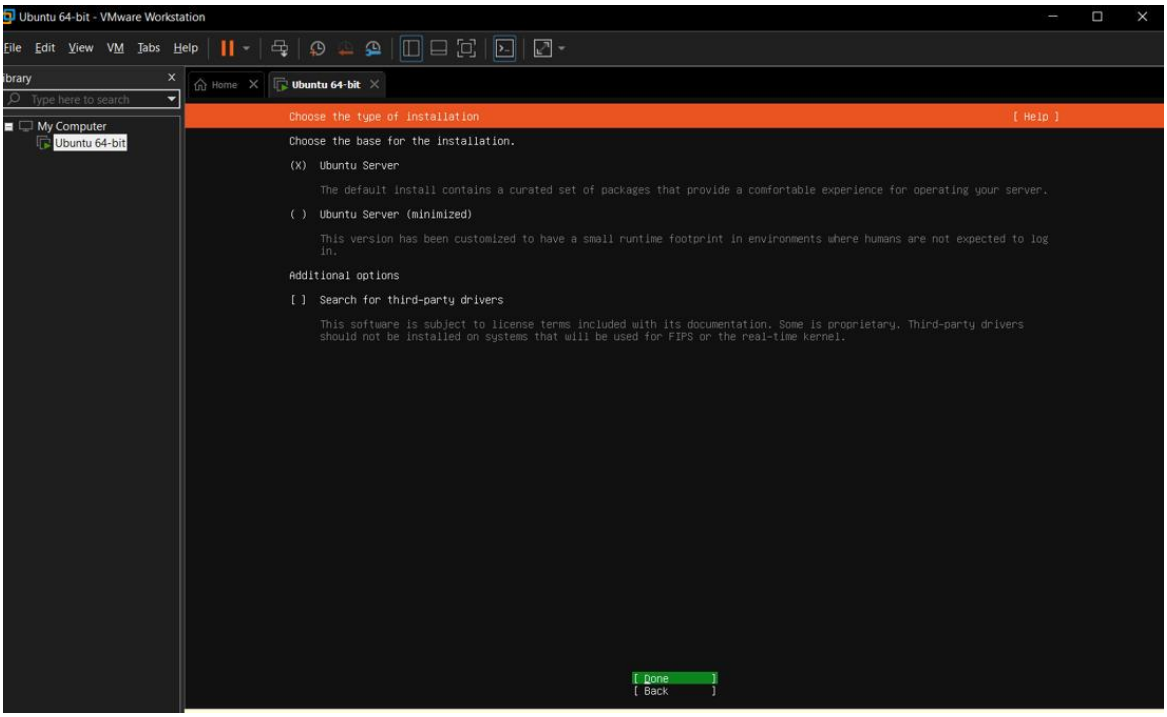

Installation language (English) selected in the Ubuntu Server installer. (ubuntu_language.png)

Task 6: Configure the Keyboard Layout

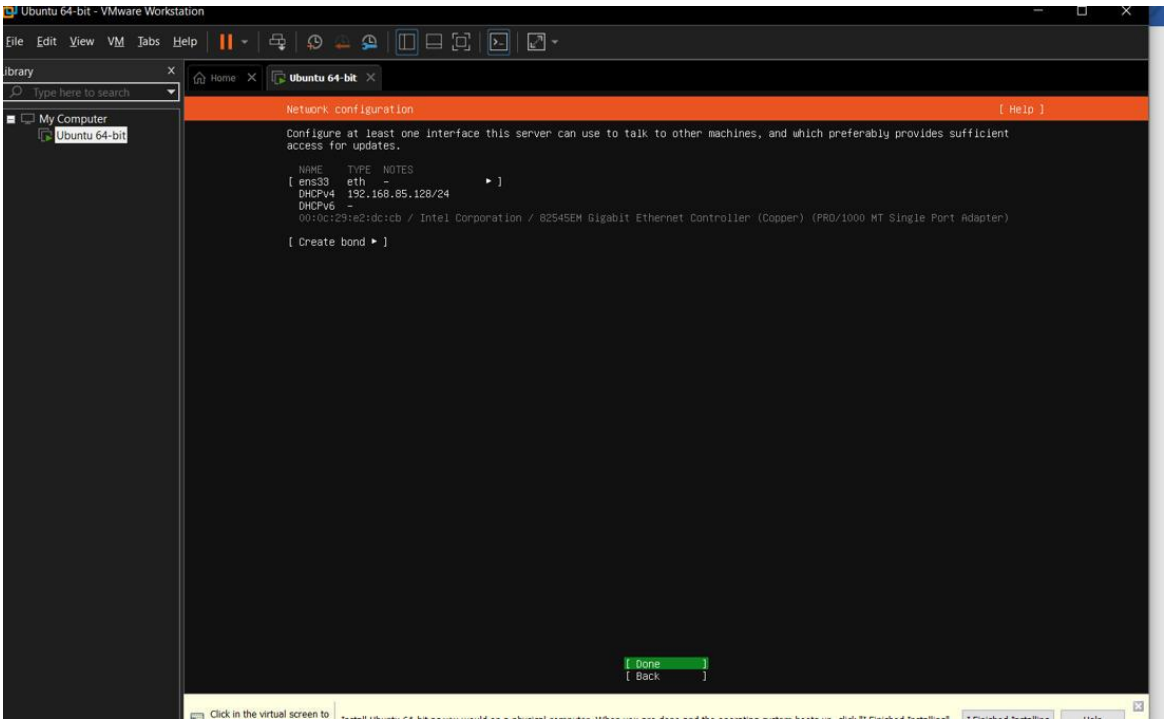

Keyboard configuration with layout English (US) and variant English (US) selected.
(ubuntu_keyboard_layout.png, ubuntu_keyboard_variant.png)

Task 7: Choose the Ubuntu Server Installation Type

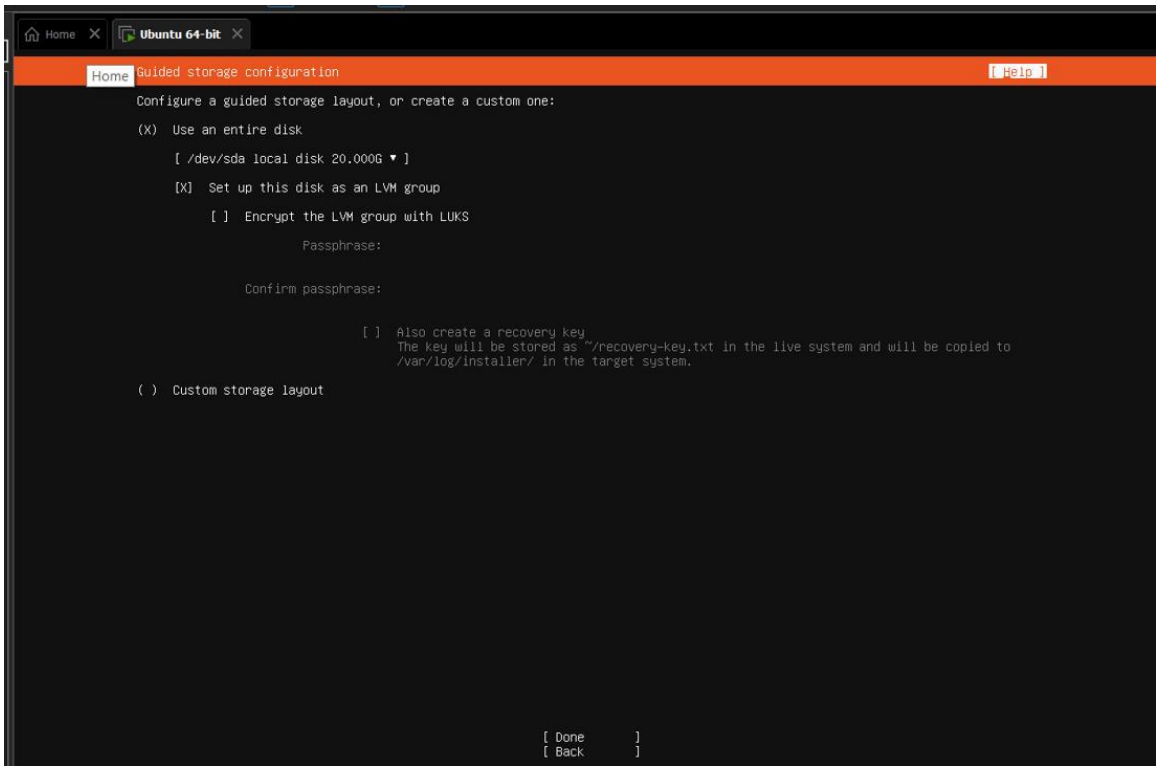

Normal Ubuntu Server installation type selected (not minimized). (ubuntu_installation_type.png)

Task 8: Configure the Network

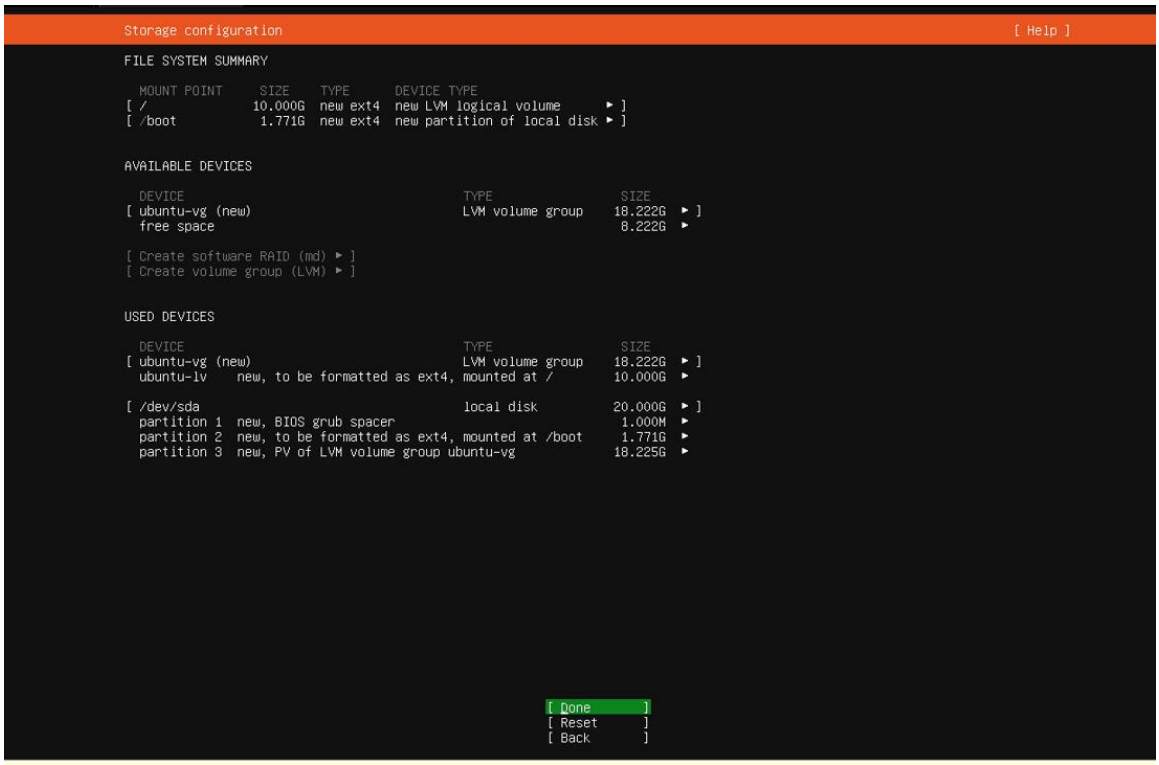

Interface ens33 detected and IP address 192.168.85.128/24 assigned automatically through DHCP.
(ubuntu_network_interface.png, ubuntu_installer_network.png)

Task 9: Configure Storage

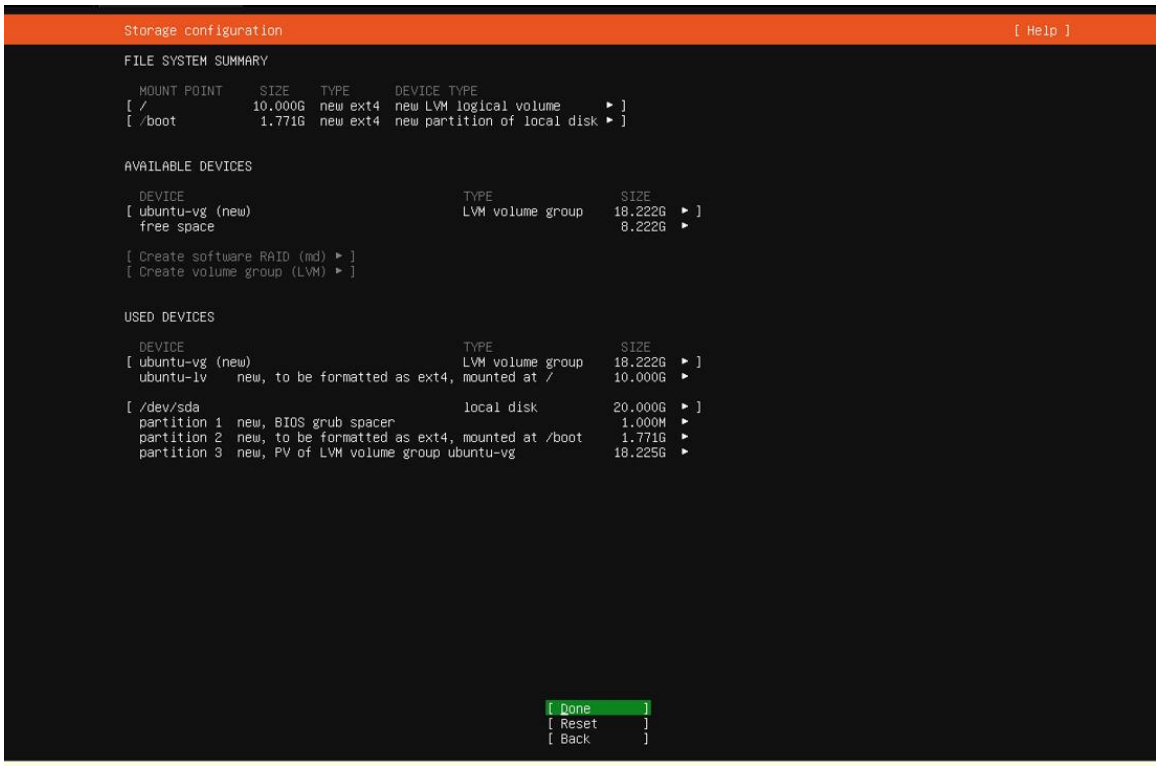

Guided storage option: use an entire disk (/dev/sda, 20 GB virtual disk) with LVM.
(ubuntu_guided_storage.png)

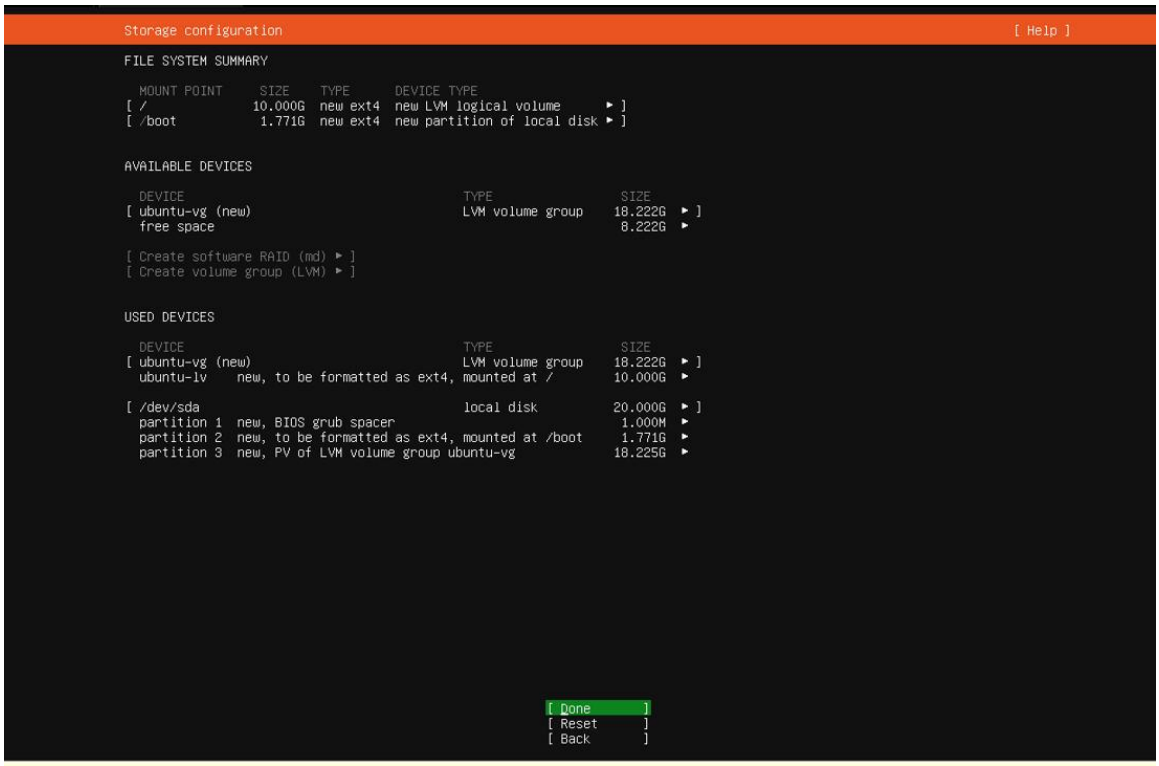

Storage configuration reviewed on the 20 GB virtual disk. (ubuntu_storage_configuration.png)

Task 10: Select the Installation Disk

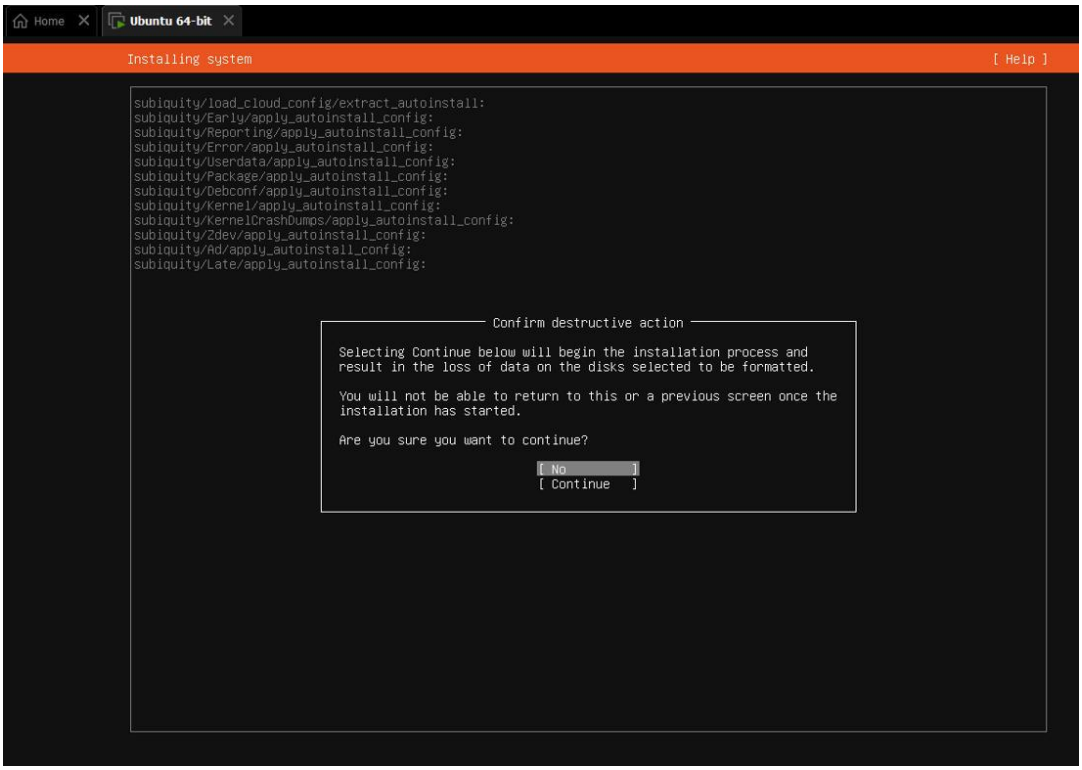

Virtual disk /dev/sda (local disk, 20.000G) selected for the installation. (ubuntu_selected_disk.png, ubuntu_disk_details.png)

Task 11: Review the Partitions

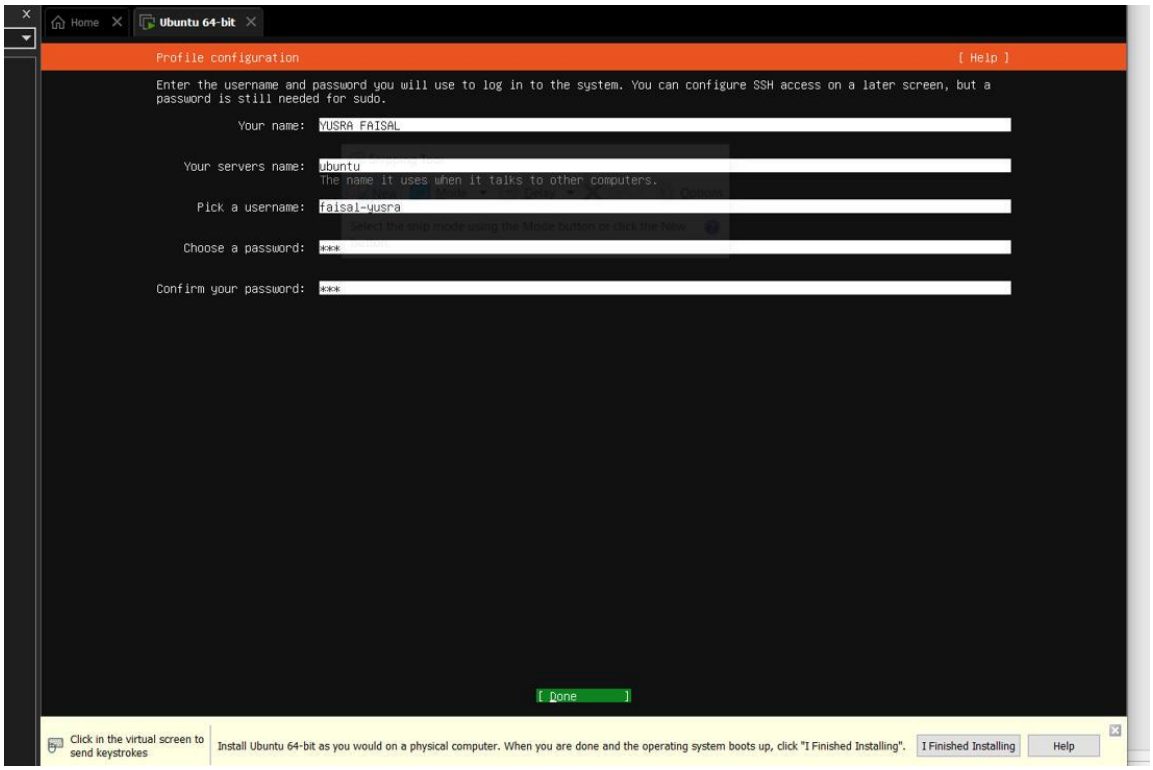

Partition layout proposed by the installer, all on /dev/sda. (ubuntu_partition_layout.png)

Task 12: Confirm the Storage Changes

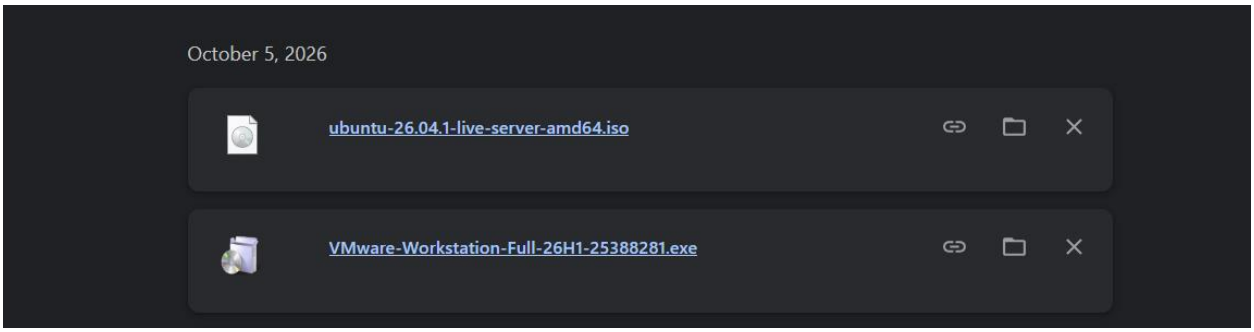

Confirm destructive action warning for the VMware virtual disk, before continuing.
(ubuntu_storage_warning.png, ubuntu_storage_confirmed.png)

Task 13: Configure the Ubuntu Profile

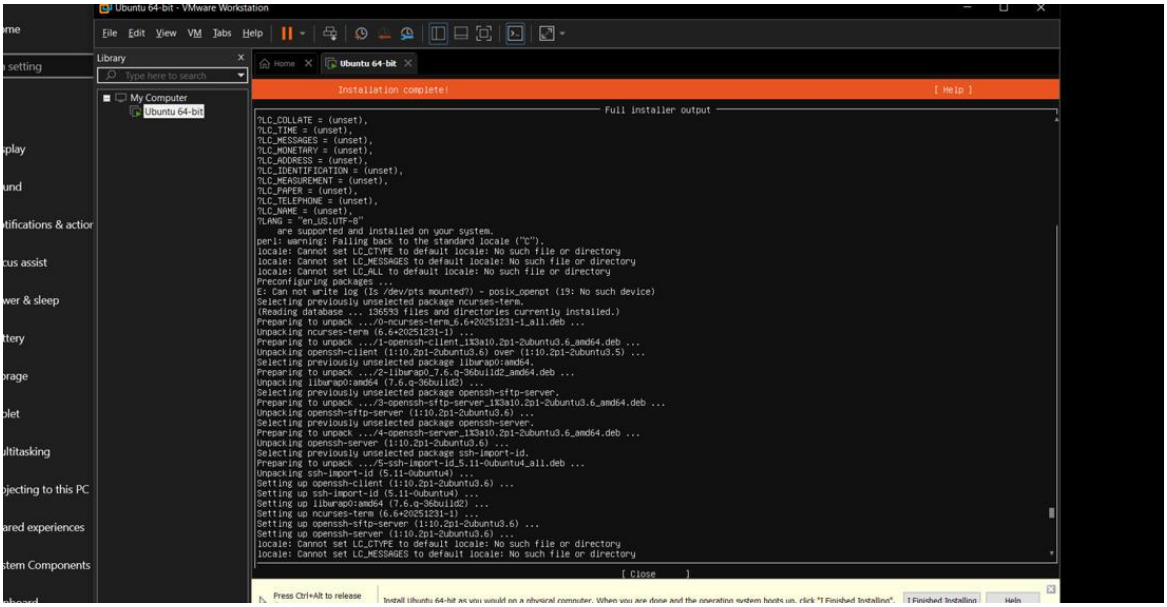

Profile page: my name, server name ubuntu and username faisal-yusra (password hidden).
(ubuntu_actual_name.png, ubuntu_server_name.png, ubuntu_username.png, ubuntu_profile_setup.png)

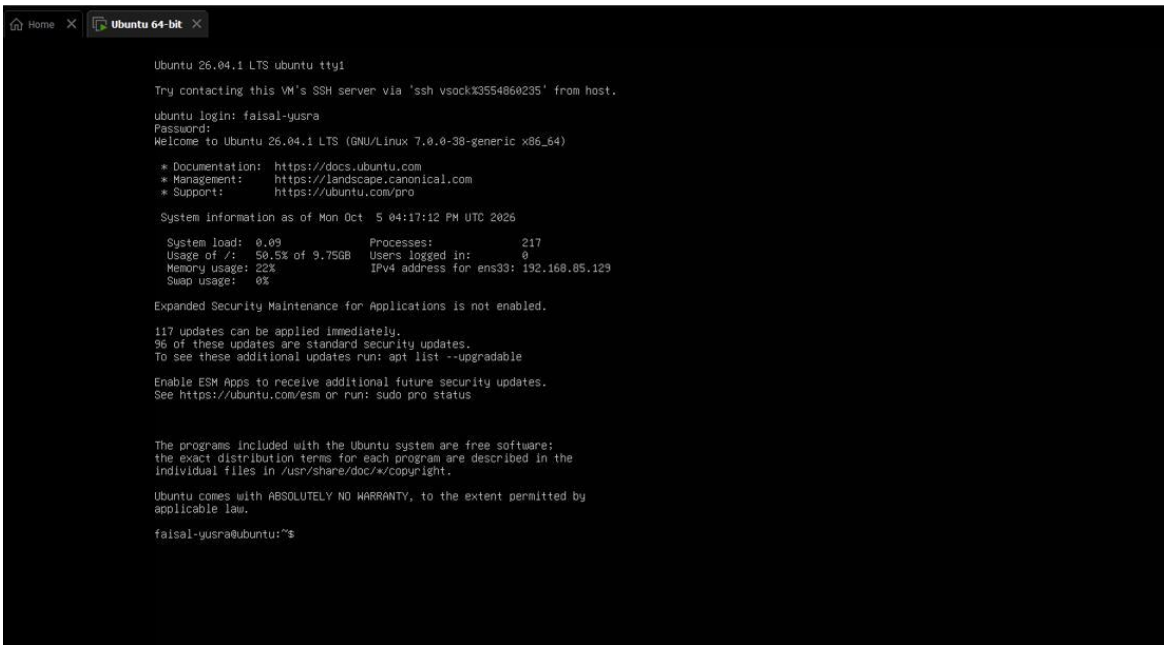

Task 14: Complete the Software Installation

Task 15: Reboot and Verify the Ubuntu Identity

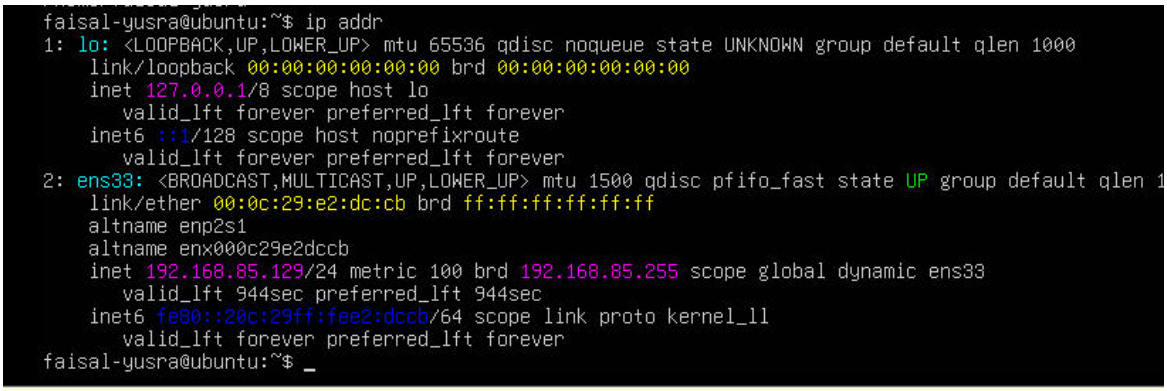

Installer output after the installation finished. (ubuntu_installation_complete.png)

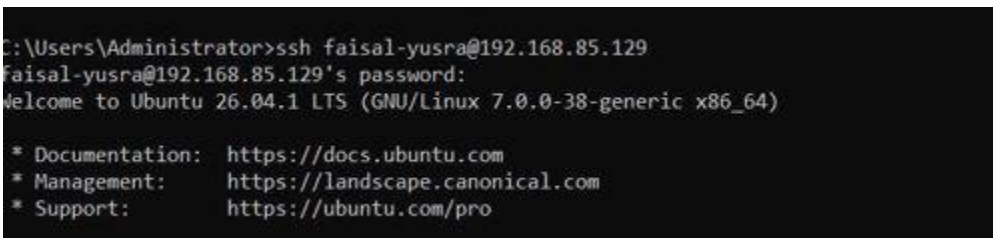

Login as faisal-yusra on host ubuntu; prompt shows faisal-yusra@ubuntu:~$. (ubuntu_login_screen.png, ubuntu_terminal_login.png, ubuntu_identity_verified.png)

Task 16: Find the Ubuntu Server IP Address

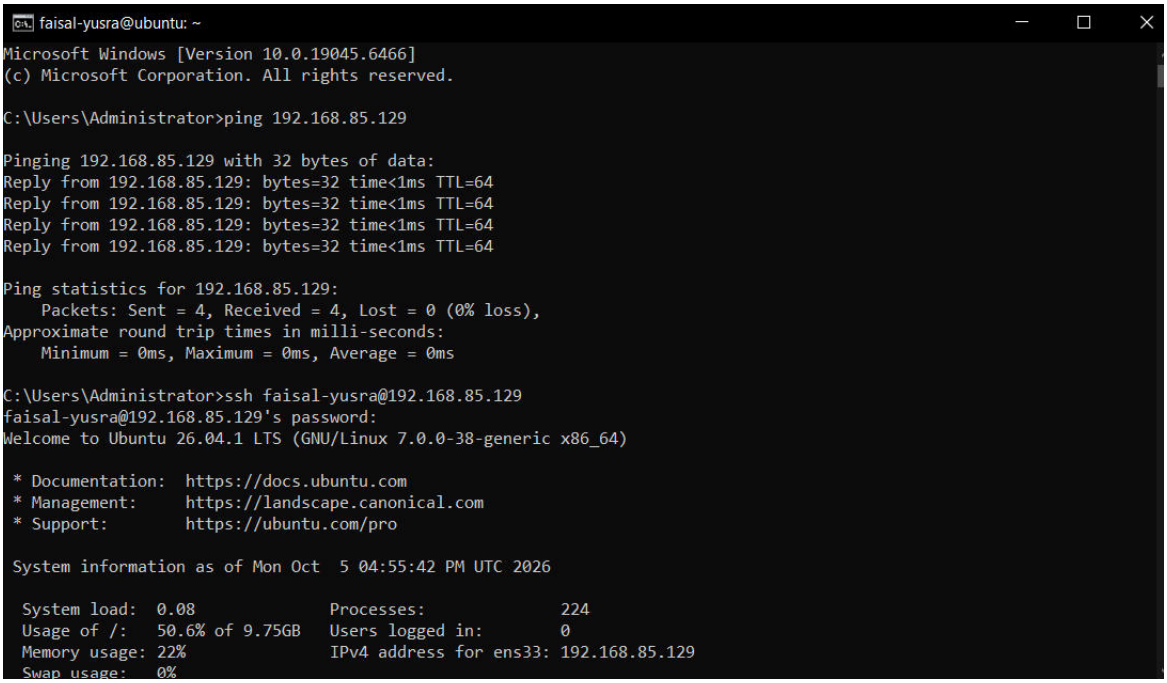

Output of ip addr: IPv4 address 192.168.85.129 on ens33, prompt faisal-yusra@ubuntu. (ubuntu_ip_addr_command.png, ubuntu_ip_address.png)

Task 17: Connect to Ubuntu Server from Windows

SSH command run from Windows, with the password prompt and the Ubuntu welcome message. (windows_ssh_command.png)

SSH from Windows to faisal-yusra@192.168.85.129, successful login (window title shows faisal-yusra@ubuntu). (windows_ssh_command.png, windows_ssh_login.png, windows_ssh_identity.png)
